Condition Grading - Trading Cards

Barry Lewis
Sr. Product Manager, Selling - Inventory Management

What Problems are We Trying to Solve with this Launch?

Add consistency and structure to provide a clear understanding of an item's condition for buyers & sellers

Current aspect model does follow industry standards for condition grading, but it is unstructured as some aspects are optional with open fields

Improve trust in the platform for buyers, while reducing the risk of fraud and returns for sellers

Offering additional condition types on individual cards across sports trading cards, non-sports trading cards, and collectible card games will improve the quality of the listing.

Simplify the seller experience

Remove ambiguity
